PROFESSIONAL SUMMARIES

Cybersecurity and IT Support Specialist with hands-on experience in enterprise IT infrastructure, network administration, cloud-based SaaS platforms, and security-focused system management. Experienced in Windows administration, Active Directory, TCP/IP networking, VLANs, DHCP, DNS, Wireshark packet analysis, and troubleshooting enterprise environments. Skilled in identity and access management (IAM), role-based access control (RBAC), SaaS administration, API integrations, automation workflows, and security operations through experience managing Zoho CRM environments. Proficient in PowerShell, Python, SQL, Kali Linux, VMware, Windows Server, and cybersecurity frameworks including NIST Cybersecurity Framework (CSF), Risk Management Framework (RMF), and MITRE ATT&CK. Strong foundation in network security, vulnerability analysis, threat modeling, security controls, and technical support with a focus on improving system reliability and organizational security posture.

PROFESSIONAL EXPERIENCE

IT Support Tech

Feb '26 — May '26

Rocketship Public Schools

Washington, DC

- Deliver onsite IT support for Rocketship DC school campuses for 1000 + users providing troubleshooting and repair coordination for Chromebooks, MacBooks, printers(papercut print servers, email to scan , IP printing and TCP/IP configuration) copiers, projectors, TVs, Apple TVs, and VoIP phones.
- Configure and secure MacBook endpoints using Jamf and FileVault Encryption, while supporting reimaging of Macbooks, Ipads (with Apple Configurator) , powerwash of chromebooks also deployment, and configuration of 1000 + devices for regional users.
- Perform diagnostics, troubleshooting, and repair coordination for Chromebooks and Macbooks including documenting hardware issues on repair slips, secure e-waste and preparing devices for vendor shipment through Inspiroz.
- Perform routine wireless network spot checks to identify weak signal strength, connectivity issues, network interference, and performance degradation, and escalate complex issues to the network team.
- Troubleshoot network outages and connectivity problems within MDF and IDF/RDF environments, supporting restoration of internet and internal network services.
- Maintain accurate Jira asset management records in Jira, including inventory tracking for new and existing laptops, user assignments, serial numbers maintaining documentations, asset records, and SLA standards
- Maintain Jira Confluence with knowledgebase of different topics about Networking, including DHCP, DNS, TCP/IP, OSI model to contribute in the company's knowledge base

Tech Support

Feb '25 — Feb '26

CNT Logistic LLC

Waterbury, CT

- Provided Tier 1 technical support for 50+ users across US and international locations in a Windows-based environment, troubleshooting hardware, software, and connectivity issues to ensure minimal downtime
- Configured and deployed Windows workstations and laptops for new employees including OS setup, software installation, and user account creation
- Administered GoToConnect and RingCentral VoIP systems managing user accounts, extensions, call routing, and quality assurance across the organization
- Supported daily operations across Central Dispatch, BATS CRM, and HelpScout resolving access issues, software errors, and platform connectivity problems for end users
- Managed user account provisioning and access permissions across multiple business platforms enforcing appropriate access controls for all staff
- Logged, tracked, and resolved technology support tickets using ServiceNow for a distributed workforce of 50+ users across US and international locations maintaining accurate records, SLA compliance, and detailed resolution documentation

- Documented recurring technical issues and resolutions to build an internal knowledge base reducing repeat support escalations
- Developed and maintained standardized canned response libraries in HelpScout improving team communication consistency and response time
- Troubleshoot internet connectivity and wireless network issues across the office environment escalating complex outages to the ISP with detailed findings
- Coordinated new employee onboarding by configuring email accounts, software access, and workstations ensuring day one productivity
- Trained end users on business platforms including Central Dispatch, BATS CRM, GoToConnect, and HelpScout reducing operational errors and improving platform adoption
- Monitored call recording quality through RingCentral ensuring compliance with internal communication standards and customer service policies

Zoho CRM Administrator & Automation Specialist

Apr '21 — Jul '24

Levoyage Movers and Packers

Dubai, UAE (Remote)

- Administered and secured a cloud-based Zoho CRM environment by managing user provisioning, role-based access control (RBAC), and permission sets for 50+ users.
- Increased operational efficiency by 35% by designing custom CRM layouts, dashboards, reports, and automated business workflows.
- Reduced manual workload by 80% by developing Zoho Deluge scripts and workflow automation for lead management, customer notifications, and task assignments.
- Improved customer engagement by 40% by implementing automated SMS and email follow-up workflows based on lead lifecycle stages.
- Integrated CallGear VoIP with Zoho CRM using REST APIs and webhooks, reducing manual call logging by 90% and improving reporting accuracy.
- Developed executive dashboards to monitor inbound calls, missed calls, conversion rates, sales KPIs, and agent performance.
- Managed VoIP administration, including SIP provisioning, user account management, extension assignments, and call recording quality assurance.
- Integrated Woztoll with Zoho Cliq to enable WhatsApp Business communication within Zoho CRM, improving customer response time by 30%.

- Implemented secure third-party integrations using REST APIs, OAuth, API keys, and webhooks while maintaining data integrity.
- Collaborated with cross-functional teams to gather requirements, deploy CRM enhancements, troubleshoot issues, and document system configurations.

EDUCATION AND CERTIFICATIONS

Masters in Cybersecurity, Hood College, Fredrick (GPA: 3.44)

Frederick, MD

- Core Courses
 - Information Systems Security
 - Telecommunications & Networking
 - Applied Database Concepts
 - Network & Internet Security
 - Info Assurance & Risk Assessment
 - Computer Forensics
 - Security Policy, Ethics & Law
 - Ethical Hacking
 - Cybersecurity Capstone Thesis

CERTIFICATIONS

Foundations of Cybersecurity, Google	
Telecommunication and Networking, Hood College	May '01
Advanced Cybersecurity Management Training, ACSMI	Feb '25
Fundamentals of IT, PJ Cyber-Security School	Jan '01

PROJECTS

- Cybersecurity Portfolio — Ethical Hacking and Digital Forensics [Link](#)
- GNS3 Multi Floor Network Topology Design [Link](#)
- RiskGuard GRC Risk Management Framework for CNT Logistics LLC [Link](#)
- Enterprise Risk Management Plan Acme Corporation [Link](#)

SKILLS

Technical Skills Nmap, Metasploit, Network Design, TCP/IP, OSI Model, Burp Suite, Virtual Machines, Network Security, AI Studio, Active Directory Management, Windows MMC, FTK, Jira, OKTA, Jamf, NIST Cybersecurity Framework, Role-Based Access Control (RBAC), VOIP, MITRE ATT&CK Framework

Programming Python 3, SQL, Bash

Operating Systems Windows, Ubuntu, Linux
